Approval of AGEMA Germany GmbH

Dear Mr. Storr,

We are pleased to confirm that dielectrics from oelheld GmbH have been used successfully for years by many customers worldwide on EDM machines from AGEMA Germany GmbH. We also use dielectrics from oelheld GmbH for machine acceptance tests at our demonstration centre in Germany.

We have only had positive results with regard to erosion performance. Therefore, the dielectric fluids IME 56, IME 63 and IonoPlus IME-MH from oelheld are approved and recommended for use on AGEMA Germany GmbH EDM machines.

Yours sincerely

AGEMA Germany GmbH

Roman Kerres

Managing Director
