TEKNIKRESURS

WOOD PROCESSING TECHNOLOGY

In 1993 Stefan Andersson founded Höga Kusten Teknikresurs. At this time he was the sole working engineer in the company. Today Höga Kusten Teknikresurs is a part of Arat Group, Andreas Fällidin is CEO and Stefan Andersson is CMO/CTO. Together with 30 employees, the company continues to grow with its headquarters in Svartnora, Sweden.

Our manufacturing takes place in our workshops in Svartnora and Nyland, as well as in close collaboration with a number of contract manufacturing workshops. This results in short lead times and high quality in both large and small projects.

Our vision

Our vision is by responsiveness, creativity and flexibility establish a close and simple relationship to our customers. We want our customers to feel safe knowing that our service and product quality correspond to what we promise.

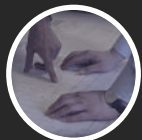

Our business concept

Our business concept is to offer our customers high quality technical solutions, support through the whole process and product development specially designed to fulfill our customer's needs.

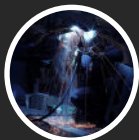

Our services:

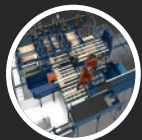

Mechanical engineering & product development

Project planning & management

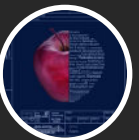

Manufacturing, test & validation

Product sales

Design & visualization

Education

Our specialist skills:

- Mekatronic
- FMEA
- FEM
- CAD, PDM
- Risk analysis & CE marking according to current standards
- Mechanical engineering
- Hydraulic
- Pneumatic
- Sawmill technology & wood processing
- System solution engineering
- Laser cutting
- Vehicle & marine mec. Engineering
