

# LubTool® 4000

## Universal cleaner

**LubTool® 4000** is a highly effective cleaner which can be used on most different soilings because of its combination of cleaning-active components.

**LubTool® 4000** is especially suited for the removal of resin oil and grease remains, most coatings, paints and crayon marks as well as general soilings on motors and machines. Perfect for preparing of bondings and coatings.

### Application:

Spray LubTool® 4000 from a short distance heavily on your surface and scrub it immediately. Keep can in a upright position. Do no use it on leather. Coatings, plastics and elastomers can be detached. We recommend to test the stability of these materials in a hidden position.

Only use it outside or in well ventilated rooms. For further information regarding use of the product please see our SDS.

### Advantages:

Cleans fast and efficiently any oil, grease, glue and sealing material

- remains
- evaporates residue-free
- economical in use
- free from hydrocarbons
