

Variosort

Control suite for all lumber process

Customer benefits

- ✓ Controls sorting, trimming, bundling and packaging at high speeds
- ✓ Allows quick and efficient sort changes
- ✓ Optimizes use of boxes through dynamic allocation
- ✓ Visualizes and monitors in real-time ongoing operations status of the line
- ✓ Reduces wear with intelligent box feeder valve control

Variosort control suite supervises the fully automated sorting and packaging, bundling, and wrapping of lumber. Variosort works with all mechanical systems such as horizontal and vertical sorters, green or dry buffers. Variosort control suite also manages trimming and operates with all conventional mechanical systems.

Species

- ✓ Softwood
- ✓ Hardwood

Feeding

- ✓ Transverse
